## **THE EMERGENCY**

The science is clear: It is understood that we are facing an unprecedented global emergency. We are in a life or death situation of our own making. We must act now.

## **THE TRUTH**

We are facing an unprecedented global emergency. Life on Earth is in crisis: scientists agree we have entered a period of abrupt climate breakdown, and we are in the midst of a mass extinction of our own making.

## **WE DECLARE**

Non-violent rebellion against the U.S. government for its criminal inaction on the ecological crisis.

## **OUR STRATEGY**

At the core of Extinction Rebellion's philosophy is nonviolent civil disobedience. We promote civil disobedience and rebellion because we think it is necessary — we are asking people to find their courage and to collectively do what is necessary to bring about change.

## **WE DEMAND\***

**1**

That the government tell the truth about the climate and wider ecological emergency.

**2**

That the government enact legally-binding policies to reduce carbon emissions to net zero by 2025.

**3**

That a citizens' assembly be formed to oversee the changes and to create a democracy fit for purpose.

**4**

That a just transition prioritizes the most vulnerable people and repairs the effects of ongoing ecocide to maintain a livable, just planet for all.
